Dear Residency Program Director:

We are a small group practice of three ophthalmologists and two optometrists in Rochester NY looking for a well trained, comprehensive ophthalmologist to eventually become a partner in our practice.

All three of the Ophthalmologists in our practice are part time clinical faculty at the University of Rochester and are involved in medical student and ophthalmology resident education. We practice comprehensive ophthalmology and are involved in most aspects of medical and surgical ophthalmology. We all are ROP certified examiners and regularly rotate through the NICU at Strong Memorial Hospital.

Our practice has two locations with optical shops and we are part owners of a 4 room ASC walking distance from our main office. A full complement of diagnostic equipment can be found at our main office including a Cirrus OCT, Corneal Topography, Wave Front Analysis, Visual Field, Corneal Pachymetry, Fundus Photography and an IOL Master.

We pride ourselves in providing high quality compassionate care in an atmosphere that is supportive of both patients and staff and look forward to adding a new ophthalmologist to our team. We would appreciate it if you would pass this job opportunity on to your residents.

Our practice can be viewed at rochestereyeassociates.com and our surgery center at brightonsurgery.com. We can be contacted by e-mail at rolsen1@rochester.rr.com.

Thank you very much for your help.

With warm regards,

Dennis Asselin M.D.

Robert Olsen M.D.

Kyle Williams M.D.
